Summary

Full Stack Developer with hands-on experience developing responsive and database-driven web applications using React.js, Node.js, Express.js, Django, Python, JavaScript, MongoDB, and MySQL. Experienced in building reusable frontend components, RESTful APIs, third-party API integrations, authentication and authorization, and database-backed applications. Strong foundation in Git, GitHub, software testing, debugging, OOP, SDLC, and responsive web development.

Education

B.E. Electronics and Communication Engineering

Mohamed Sathak Engineering College

2021 – 2025

CGPA: 8.35 / 10

Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java (Basic), HTML5, CSS3

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Django, RESTful APIs

Databases: MongoDB, MySQL, SQL, RDBMS

Authentication & Security: JWT Authentication, Authorization, Protected Routes, Secure User Sessions

Core Concepts: OOP, Data Structures & Algorithms, SDLC, Software Testing, Debugging, Responsive Web Development

Tools: Git, GitHub, VS Code, Linux

Experience

Junior Software Developer Trainee

CADD Technologies — On-site

May 2026 – Present

- Develop responsive and user-friendly web applications using React.js, JavaScript, HTML5, CSS3, Tailwind CSS, and RESTful APIs.
- Build reusable React components and integrate frontend interfaces with backend APIs for database-driven application features.
- Implement and consume REST APIs while following maintainable coding practices and modular application design.
- Perform application debugging, testing, issue resolution, and software maintenance to improve functionality and usability.
- Use Git and GitHub for source control, collaborative development, and maintaining code throughout the software development lifecycle.

Full Stack Web Developer Intern

TECHVOLT Software Pvt. Ltd. — On-site

July 2024 – August 2024

- Developed responsive web applications using HTML5, CSS3, JavaScript, Python, Bootstrap, and Django.
- Assisted in developing backend functionality using Django and integrating RESTful APIs with database-driven applications.
- Worked with relational database concepts and SQL while implementing application features and data-driven functionality.
- Performed debugging, software testing, feature implementation, and application maintenance to resolve functional issues.
- Used Git and GitHub for version control and collaborated on development tasks following software development practices.

Projects

QuickChat – Real-Time Chat Application

Project Link

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS
- Developed a full-stack real-time chat application using the MERN stack with Socket.io for real-time messaging and communication.
- Built reusable and responsive React components for chat interfaces, user lists, online status, and message management.
- Developed backend RESTful APIs using Node.js and Express.js for user and message management.
- Implemented JWT-based authentication and authorization with protected routes and secure user sessions.
- Integrated MongoDB for persistent storage of users, messages, and chat history.

QuickBite – Food Delivery Application

Project Link

- **Tech Stack:** React.js, Redux Toolkit, JavaScript (ES6+), Tailwind CSS, REST APIs, JSON
- Developed a responsive food delivery web application using React.js with restaurant listings, search, filtering, and cart management functionality.
- Integrated RESTful APIs and processed JSON data to dynamically retrieve and display restaurant and application content.
- Implemented Redux Toolkit for centralized state management of cart, application data, and user interface functionality.
- Built reusable React components and responsive layouts using Tailwind CSS for consistent desktop and mobile experiences.

- Implemented React Router for client-side navigation and structured the application into maintainable modules.

Crypto Tracker

Project Link

- **Tech Stack:** React.js, Vite, React Router, CoinGecko REST API, Clerk Authentication, React Google Charts
- Built a responsive cryptocurrency tracking application using React.js with market data, search functionality, and multi-currency support.
- Integrated the CoinGecko REST API to consume third-party data and dynamically display cryptocurrency market information.
- Implemented authentication using Clerk and managed protected application functionality for authenticated users.
- Developed interactive historical price charts using React Google Charts to visualize cryptocurrency market trends.
- Used reusable React components and responsive layouts to deliver a consistent user experience across desktop and mobile devices.

Certifications

- **Junior Software Developer** – CADD Technologies
- **Full Stack Web Development** – TECHVOLT Software Pvt. Ltd.
- **Python Essentials 1 & 2** – Cisco Networking Academy
- **HTML Certification** – Spoken Tutorial
